

# Gustavo Jasso

## Doctor of Philosophy

University of Cologne  
Faculty of Mathematics and Natural Sciences  
gjasso@math.uni-koeln.de  
<https://gustavo.jasso.info>

### Biographical information

Full name Gustavo Jasso Ahuja  
Date of birth March 18, 1987  
Place of birth Guadalajara, Mexico  
Nationality Mexican

### Research interests

Primary Representation theory of quivers and algebras  
Secondary Homological algebra, homotopical algebra, higher category theory  
Cluster algebras and the related combinatorics

### Employment history

Since 2024 **Universitätsprofessor für Algebra (W2, permanent position)**, *Faculty of Mathematics and Natural Sciences, University of Cologne*, Cologne, Germany, 15.08.2024  
01.04.2025–31.03.2026: Head of Division (Abteilungsleiter), Division of Mathematics of the Department of Mathematics and Informatics.  
2022–2024 **Universitetslektor (Senior Lecturer, permanent position)**, *Centre for Mathematical Sciences, Faculty of Science, Lund University*, Lund, Sweden, 01.03.2022–14.08.2024  
2017–2022 **Akademischer Rat auf Zeit**, *Mathematisches Institut, Rheinische Friedrich-Wilhelms-Universität Bonn*, Bonn, Germany, 01.10.2017–31.03.2022  
Contributor to Research Area A2 – Representations and symmetries in algebra and topology.  
Parental leave: 13.10.2021–13.12.2021.  
Unpaid leave: 01.03.2022–31.03.2022.  
2014–2017 **Hausdorff Postdoc**, *Hausdorff Center for Mathematics, Rheinische Friedrich-Wilhelms-Universität Bonn*, Bonn, Germany, 01.10.2014–30.09.2017  
Mentor: Prof. Dr. Jan Schröer.

### Education history

2011–2014 **Doctor of Philosophy (Mathematical Science)**, *Nagoya University*, Nagoya, Japan, Graduation date: 29.09.2014  
Thesis title: On  $\tau$ -tilting theory and higher Auslander-Reiten theory.  
Advisor: Prof. Dr. Osamu Iyama.  
2009–2011 **Master of Sciences degree in Mathematics (with honorific mention)**, *Universidad Nacional Autónoma de México (UNAM)*, Mexico City, Mexico, GPA: 9.67/10  
Thesis title: El crecimiento de un álgebra de conglomerados de tipo tubular (The growth of a cluster algebra of tubular type).  
Advisors: Prof. Dr. Michael Barot (official) and Prof. Dr. Christof Geiss (unofficial second advisor).

- 2005–2010 **Undergraduate degree in mathematics (with honorific mention)**, *Universidad Nacional Autónoma de México (UNAM)*, Mexico City, Mexico, GPA: 9.84/10  
 Thesis title: Álgebras de Lie de tipo afín extendido y formas cuadráticas (Extended affine Lie algebras and quadratic forms).  
 Advisor: Prof. Dr. Michael Barot.

## Grants and academical distinctions

- 2024 **Grant to recruit a foreign researcher for a postdoctoral position in Sweden**, *Knut and Alice Wallenberg Foundation*, 2.000.000 SEK, Declined.
- 2023–2026 **Research project grant within natural and engineering sciences**, *Swedish Research Council (Vetenskapsrådet)*, 3.520.000 SEK  
 Project title: Higher structures in higher-dimensional homological algebra. Stopped in 2024 due to move to the University of Cologne.
- 2022 **11th Award for Encouragement of Alumni and Students (Hida Award)**, *Alumni Association of the Graduate School of Mathematics, Nagoya University*, Nagoya, Japan  
 Awarded to graduates of the Department of Mathematics, Faculty of Science, Nagoya University, or graduates of the Graduate School of Mathematics, Nagoya University, who are recognised to have achieved outstanding results through their dissertations, articles published in academic journals, books, and other research achievements.
- 2018 **International Conference on Representations of Algebras (ICRA) 2018 Award**, *ICRA 2018 Scientific and Award Committees*, Prague, Czech Republic  
 Awarded at each session of ICRA for outstanding work by young mathematicians (not older than 35 years of age, except to allow for a broken career) in the field of Representations of Finite Dimensional Algebras. A second prize was awarded to Dr. Julian Külshammer (Uppsala).
- 2010 **Premio Sotero Prieto 2010**, *Sociedad Matemática Mexicana*, Tuxtla Gutiérrez, Mexico  
 Awarded to the best undergraduate thesis in mathematics presented at a Mexican institution between June 2009 and May 2010 (three theses were recognised).

## List of publications

### Preprints

- [3] G. Jasso and F. Muro, *Obstruction theory for  $A$ -infinity bimodules*, 2025, arXiv: 2507.17568.
- [2] G. Jasso,  *$Q$ -shaped derived categories as derived categories of differential graded bimodules*, 2025, arXiv: 2501.08255.
- [1] G. Jasso and F. Muro, *The Derived Auslander–Iyama Correspondence, with an appendix by B. Keller*, 2022, arXiv: 2208.14413.

### Book (in progress)

- [1] G. Jasso, *Differential graded categories in the representation theory of finite-dimensional algebras*, in progress (251 pages, approx. 50% progress). The book aims to introduce graduate students to the theory differential graded algebras and their derived categories, with a specific focus on its applications in representation theory of finite-dimensional algebras. The book tries to keep prerequisites to a minimum and therefore does not assume knowledge of the theory of triangulated categories (the relevant parts of which are introduced in the book).

**Research articles**

- [15] G. Jasso, *On a theorem of B. Keller on Yoneda algebras of simple modules*, C. R. Math. Acad. Sci. Paris 362 (2024), 1449–1454.

### Theses and dissertations

- [3] G. Jasso, *On  $\tau$ -tilting theory and higher Auslander–Reiten theory*, Doctoral dissertation, Nagoya University, 2014, comprises publications [3], [4] and [6].
- [2] G. Jasso, *El crecimiento de un álgebra de conglomerados de tipo tubular*, Master’s thesis, Universidad Nacional Autónoma de México, 2011, comprises part of publication [1].
- [1] G. Jasso, *Álgebras de Lie de tipo extendido y formas cuadráticas*, Bachelor’s thesis, Universidad Nacional Autónoma de México, 2010, comprises publication [2].
